YASS AREA NETWORK STRATEGIC PLAN

Vision

A well connected Landcare community supporting biodiversity,
productive landscapes and climate action

Mission

By working together, securing resources and
sharing knowledge, Landcare will increase
biodiversity and the sustainable use of land and
water resources across the Yass Valley.

OUR PRIORITIES

- Represent and advocate for Landcare across Yass Valley
- Educate, facilitate and resource community action
- Support and promote sustainable use of local land and waterways
- Climate Ready, Habitat Linkages, Paddock tree projects and Landcare nurseries

Community
engagement

Maintain and
increase
biodiversity

Weed and pest
management

Regenerative
agriculture

Member
wellbeing

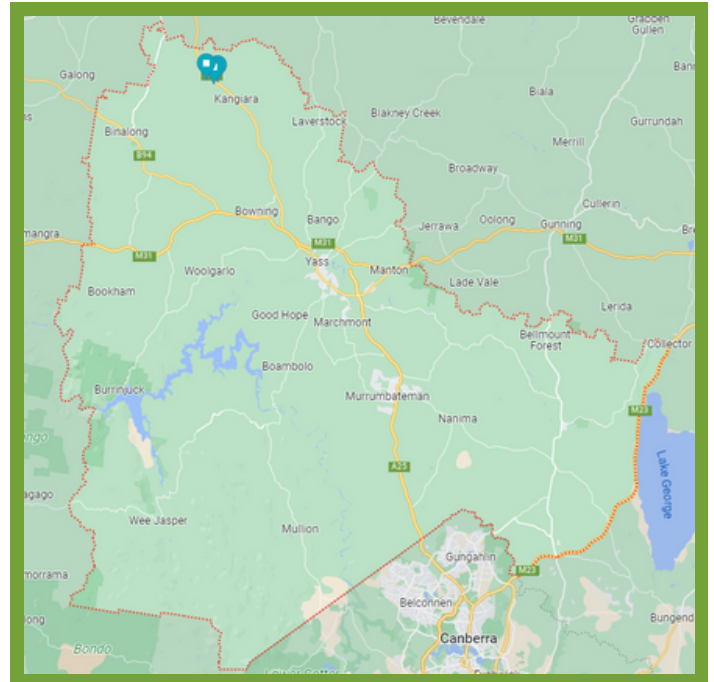

Conserve
landscapes

YAN respectfully acknowledges the traditional custodians of the places in which we are based. We also wish to share our deep respects to the Elders past, present and emerging. We have immense gratitude and respect for your community and cultural leadership.

ABOUT US

YAN was established in 1996 and its member groups include Sutton, Murrumbateman, Yass, Bowring-Bookham Landcare Groups and Friends of Yass Gorge. YAN supports individuals and families who live on residential or agricultural blocks and are interested in LandCare. We promote regenerative agriculture and revegetation projects, we support four Landcare plant nurseries which are growing plants for a changing climate. We promote the protection of endangered species and water quality across the Yass River catchment. We promote Landholder responsibilities to manage pest animals and exotic weeds and we nurture future Landcarers through the promotion of Junior Landcare resources.

We work with a number of environmental organisations and river catchment groups in our region. We are an active member of South East Landcare and regularly promote Landcare Australia and Landcare NSW products and projects. We also have good working relationships with Yass Valley Council and Local Land Services and NSW Departments of Environment, Climate Change, Water and Agriculture. For our members and interested parties we provide a comprehensive YAN newsletter and informative website.
